The 108 Advanced Toruses with Sandra Itenson Sweetman

Sacred Geometry has been used for hundreds if not thousands of years; it is an oral tradition that is gifted to us by many schools including Delphi founded by Pythagoras, the Mayan, as well as Incan wisdom.

Sacred Geometry is an ancient art, which employs geometric forms and colors as symbols, for the memory and organization of the mind and sub-conscious mind to create a reality based on our beliefs and cultural upbringing.

What we are creating is a language of light and vibration or a structure by utilizing shapes and colors.

Once mastered, it can be applied to Healing, Counseling, Research, Teaching, Designing, Life, and the creation of Peace and Harmony.

This teleclass will teach you how to use 108 different Advanced Toruses. They work with the elements of ether, air, fire, water & earth.

A Torus looks like a donut or a lifesaver candy. A torus can remove energies or bring things to you.

An Advanced Torus is capable of shifting patterns, illnesses, habits, thought forms, emotional blocks, in fact anything that no longer serves you.

To shift your life here on the material plane, you can use this simple tool which takes very little time, not much effort and has everlasting results. Each one has special properties to affect your life at all levels: physical, emotional, mental and spiritual. These shapes can be used with clients, family and yourself with amazing results.
